Worldwide Professional University Rankings

RankPro 2013/2014

According to the methodology, the rating of an institution of higher education consists of three components, which would allow obtaining a full picture of the level of the institution:

- Academic possibilities of a university - academic ranking;
- Communicability of a university internet homepage – ranking by BC-Index;
- University reputation – public ranking.

Experts: members of the International Council of Scientists.

The interrelation of these three rating components in the overall result is determined as a result of a survey conducted among members of the International Council of Scientists - professors of universities of different types from more than 40 countries.
